On-Time Delivery Rate by Customer's City

Delayed Deliveries by Days Late

Shipment Trend

Key insight: Only 37.2% of delivered orders arrive on time (within 2 days of the promised date). Kano is the weakest region at 32.9%, Ibadan the strongest at 40.9%. Delays are spread evenly from day 3 to day 7, which points to a process issue, not a few bad days.

Supplier Performance: data limitation

The Suppliers table holds 150 suppliers (ID and name only). No SupplierID exists on Products, Order_Items or any other table, so a supplier can't be linked to products, deliveries or returns. Supplier-level performance (on-time rate, return rate, revenue per supplier) therefore can't be measured honestly from this dataset.

Recommendation: add SupplierID to the product master data, then the Supplier Performance Score can be added to this page.
